

# TABLE OF CONTENTS

Introduction

|       |       |       |  |
|-------|-------|-------|--|
| _____ | In-1  | ..... | Celestial Motions  |
| _____ | In-2  | ..... | Motions of the Sun, Moon, and Planets                    |
| _____ | In-3  | ..... | Determining the Masses of the Earth and Jupiter          |
| _____ | In-4  | ..... | Spectroscopic Identification of Gaseous Elements         |
| _____ | In-5  | ..... | The Properties of Lenses and Telescopes                  |
| _____ | In-6  | ..... | Measuring the Sizes of Rings                             |
| _____ | In-7  | ..... | Measuring the Velocities of Stars                        |
| _____ | In-8  | ..... | Plotting Stars on the Hertzsprung-Russel Diagram         |
| _____ | In-9  | ..... | Classification of Stars and Galaxies                     |
| _____ | In-10 | ..... | The Hubble Redshift-Distance Relation                    |
| _____ | Out-1 | ..... | Observing the Heavens                                    |
| _____ | Out-2 | ..... | Observing the Heavens With and Without Using a Telescope |
| _____ | Out-3 | ..... | Astronomical Photography                                 |
| _____ | Out-4 | ..... | Finding the Distances and Sizes of Remote Objects        |
| _____ | Out-5 | ..... | Finding the Diameters of Celestial Objects               |
| _____ | Out-6 | ..... | Celestial Navigation                                     |
| _____ | Out-7 | ..... | Astronomical Observations                                |

Astronomical Distances
