

**PHY 711 Classical Mechanics and  
Mathematical Methods  
10-10:50 AM MWF Olin 103**

**Plan for Lecture 35:**

**Chapter 10 in F & W: Surface waves**

- 1. Water waves in a channel**
- 2. Wave-like solutions; wave speed**

11/19/2012

PHY 711 Fall 2012 – Lecture 35

22	Wed, 10/17/2012	Chap. 7, 5	Moment of inertia	
	Fri, 10/19/2012		Fall break	
23	Mon, 10/22/2012	Chap. 5	Rigid body rotation	#16
24	Wed, 10/24/2012	Chap. 5	Rigid body rotation	#17
25	Fri, 10/26/2012	Chap. 5	Rigid body rotation	#18
26	Mon, 10/29/2012	Chap. 8	Waves in elastic membranes	#19
27	Wed, 10/31/2012	Chap. 9	Introduction to hydrodynamics	
28	Fri, 11/01/2012	Chap. 9	Introduction to hydrodynamics	
29	Mon, 11/05/2012	Chap. 9	Introduction to hydrodynamics	#20
30	Wed, 11/07/2012	Chap. 9	Sound waves	
31	Fri, 11/09/2012	Chap. 9	Linear sound waves	#21
32	Mon, 11/12/2012	Chap. 9	Green's function for linear sound	
33	Wed, 11/14/2012	Chap. 9	Non-linear sound	
34	Fri, 11/16/2012	Chap. 9	Non-linear sound	Take Home Exam
35	Mon, 11/19/2012	Chap. 10	Surface waves	Take Home Exam
	Wed, 11/21/2012		Thanksgiving Holiday	
	Fri, 11/23/2012		Thanksgiving Holiday	
36	Mon, 11/26/2012	Chap. 10	Surface waves	Exam due
37	Wed, 11/28/2012	Chap. 10	Surface waves	
38	Fri, 11/30/2012	Chap. 10	Surface waves	
39	Mon, 12/03/2012		Student presentations I	
40	Wed, 12/05/2012		Student presentations II

---

---

Euler's equation for incompressible fluid :

$$\frac{d\mathbf{v}}{dt} = f_{\text{applied}} - \frac{\nabla p}{\rho} = -g\hat{z} - \frac{\nabla p}{\rho}$$

Assume that  $v_z \ll v_x, v_y \Rightarrow -g - \frac{1}{\rho} \frac{\partial p}{\partial z} = 0$

$$\Rightarrow p(x, y, z, t) = p_0 + \rho g(\zeta(x, y, t) - z)$$

Horizontal fluid motions :

$$\frac{dv_x}{dt} \approx \frac{\partial v_x}{\partial t} = -\frac{1}{\rho} \frac{\partial p}{\partial x} = -g \frac{\partial \zeta}{\partial x}$$

$$\frac{dv_y}{dt} \approx \frac{\partial v_y}{\partial t} = -\frac{1}{\rho} \frac{\partial p}{\partial y} = -g \frac{\partial \zeta}{\partial y}$$

11/19/2012 PHY 711 Fall 2012 - Lecture 35 4

---

Continuity condition for flow of incompressible fluid :

$$\frac{\partial \zeta}{\partial t} + z_0 \nabla \cdot \mathbf{v} = 0$$

From horizontal flow relations :  $\frac{\partial \mathbf{v}}{\partial t} = -g \nabla \zeta$

Equation for surface function :  $\frac{\partial^2 \zeta}{\partial t^2} - g z_0 \nabla^2 \zeta = 0$

11/19/2012 PHY 711 Fall 2012 - Lecture 35 5

---

---

---

---

---

---

---

Surface wave equation :

$$\frac{\partial^2 \zeta}{\partial t^2} - c^2 \nabla^2 \zeta = 0 \quad c^2 = g z_0$$

More complete analysis finds :

$$c^2 = \frac{g}{k} \tanh(k z_0) \quad \text{where } k = \frac{2\pi}{\lambda}$$
