

Student questionnaire - MST 321

Please turn this in to Jeremy in his office sometime between now and Friday, January 24. This will count as one of the homework problems due on 1/24. [I am asking you to do this so that (i) you know where my office is, and (ii) I have a chance to learn a little bit about you and connect your face with your name.]

Name:

Where are you from?

Do you have a definite plan for your career? If so, what? If not, what are you considering?

Are there any particular things that your past math professors have done that you've found really helpful for your learning? If so, what?

Tell me something interesting/unusual about yourself.

What other math classes have you taken? (List calculus-level and higher courses.)

Do you have a serious issue with the office hour times that I have scheduled? Are you OK with my dog being present for office hours?
