9. Do you have any other comments to add to your evaluation?

Please provide any additional constructive comments

- Great TA
- He is perhaps not consistent with homework grading :(
- He tends to go over the most basic questions and reiterate concepts that we already know. I feel it would be more beneficial if he answered questions students had about the homework problems as opposed to just continuing with the most basic concepts and problems over and over again.
- Probably review some stuff before teaching sections like the SVD thing. Also, maybe use fatter chalk. Probably also offer office hours on two different days instead of just one.
- Rob is hilarious - a great sense of humor and always willing to help. Not only was it helpful that he reviewed concepts from class - particularly during a summer session course where everything is so condensed and we fly through material in lecture - he often presented different ways to think about abstract concepts. He was easy to understand and helpful during both discussion and office hours. Even though section was often quiet, he encouraged collaboration with other students and didn't just dish out answers. Overall, very helpful and an excellent TA. Thanks, Rob!
- Rob made math concepts clearer after lecture. He provided examples that helped with understanding the material.
- Super kawaii desu~
  Loved your smile :D
- While challenging at times, your style of teaching which involved forcing the student to do the work and answer questions did prove very worth while, it was just a little intimidating at first with a genuine lack of understanding of the material on the student side. Overall though great job!
- yea rob!
