9. Do you have any other comments to add to your evaluation?

*Please provide any additional constructive comments*

- Great TA
- He did a pretty good job, he is a good teacher.
- I really appreciated Rob's patience in explaining the various concepts. He also dumbed it down for us a lot, which made it easier to understand. He pointed out connections between the theorems, definitions, etc. Mm, pretty much everything was really helpful. Thanks for everything! :)
- Obviously understands the material and would like the students too. Facilitates note-taking, though sometimes writes out of order and would make it confusing at times. Overall his sections were enjoyable and helpful.
- Rob is so smart and so good at explaining the material. He made hard questions seem so easy. He's also super cheerful. Probably the best math TA I've had at UCSD.
- Rob is very patient, even with difficult characters. Very strong TA and enjoyed his section, please use him again, if he is okay with that
- TA is clearly very smart and knowledgable on 142A material so sometimes it comes off very intimidating to a student who has difficulty in understanding material as easily as everyone else. Because of this, it most definitely prevented me from asking questions. From my experience, it wasn't a comfortable learning space but I'm sure it is different for other students who are acquainted with his way of teaching.
